Work Experience

January 2018-Present

Echo Global Logistics, Chicago, IL
Software Engineer
- In charge of maintaining Echo's proprietary customer facing software.
- Maintained the application's backend (.NET API) as well as their application's frontend (AngularJS).

	● Worked on upgrading the frontend codebase from AngularJS to Angular 7.
	● Maintained older proprietary applications (.NET MVC, .NET Web Forms).
	● Worked with their Data Team and Business Analysts in order to deliver on features for sprints.
August 2017-December 2017	**Loyola University Chicago**, Chicago, IL Computer Science Tutor
	● Review recent Computer Science homework assignments and tests scores with students, and work through problems or questions that the student did not answer correctly.
	● Skills Used: Java, Python, Git
June 2017-August 2017	**Echo Global Logistics**, Chicago, IL Software Engineering Intern
	● With a team, we recreated one of Echo's desktop applications into a web application.
	● Skills Used: HTML, JavaScript, CSS, Angular, ELK Stack, SQL, C#, Agile
